IV. Daniel 9

I. Years of judgment

7) 430 years – 70 years (Babylon) = 360 years
8) 360 years X 7 = 2520 years of judgment
9) 2520 years X 360 day years = 907,200 days
10) Subtract all the calendar changes** = 906,586
11) On our calendar 2483 years, 9 months, 21 days

*To correct for the leap years you need to add 1 day for every 4 years but subtract 3 days for every 4 centuries (to account for the exception for century years divisible by 400), and also adjust for the Gregorian calendar reform which deleted all the days in-between September 3rd and September 14th 1752.
